"Custom Motorcycle Wheels"...

When we say "Custom Motorcycle Wheels," at Renegade Wheels we mean it.

No one envisions and delivers a more exotic or custom product than Renegade, one of the leading suppliers to the premier motorcycle builders in the world. We are excited to offer four new cutting edge styles to meet your 2017 design needs - Warwick, Tulsa, Baxter and Bridgeport - our most innovative and unique wheels to-date. We're also introducing the new 1445 Hub incorporating the 2014/2017 Harley Davidson stock "floating" rotor system components which eliminate irritating rotor run out.

Chuck on his 2003 Fatboy, the bike credited for inspiring the inception of Renegade Wheels.

Renegade was founded 12 years ago with a vision of bringing truly innovative designs and new manufacturing techniques to the industry. Consequently, Renegade Wheels enjoys an industry reputation of having the most advanced and recognizable product offering industry-wide. And in fact, Renegade's vision and forethought advanced bike trends into the next decade.

WARWICK

new 2014

WARWICK

Phantom-Cut

The Warwick pronounced; (war-ick) is one tough looking swept 5-spoke wheel. Every spoke appears to be three uniquely layered blades on top of each other. The Warwick spokes generate a look that embodies movement, even at a stand-still. Available up to and including 30" in diameter, finished in show Chrome or Black Anodized, and then hand polished Phantom-Cut.

BRIDGEPORT
Phantom-Cut

BRIDGEPORT

The Bridgeport will enhance the look of your bike like nothing else! This intentionally geometric 14-spoke wheel looks fantastic with its angular 3D machined spokes and extensive machining on the rim. The Bridgeport fills the need for a robust spoke design eliminating all the troubles associated with tube carrying wheels with traditional spokes. The Bridgeport is available up to and including 30" in diameter, finished in show Chrome or Black Anodized, and then hand polished Phantom-Cut.

BAXTER

BAXTER
Phantom-Cut

Our newest split 5-spoke wheel, dubbed Baxter, has a rock solid look. The way in which the spokes split is truly unique and works great on any bike, bagger or Dyna alike. The Baxter is available in show Chrome or Black Anodized, and then hand polished Phantom-Cut.

Tulsa Matching Pulley
Tulsa Dual 11.8" Matching Rotors
Tulsa Phantom Cut Air Cleaner
Renegade Hidden Front Axle kit 25mm
Color Matched Paul Yaffe 21" Wrap Front Fender

TULSA

Tulsa, is the newest design from Renegade Wheels, with state-of-the-art Asymmetrical Machining. At first glance Tulsa's simplistic design looks much like a classic split 5-spoke wheel. But take a closer look and you'll be amazed at the unique full 3D effect on both sides. New to our industry, Asymmetrical machining allows deep surfacing that cannot be achieved in traditional symmetrical designed wheels.

WHISTLER

As with the majestic mountain slopes it's named after, each of the Whistler nine spokes boasts a twisted 180° angle. Hours are invested in production of the Whistler with its inception as a solid forged block of 6061 aluminum alloy which offers added strength and beauty. We like to think of the Whistler as uniquely and extraordinarily Renegade.

Finish Options

**USA
MADE**

We are proud of our unmatched breadth of styles and finishes... and unequaled ability to offer unique combinations from standard one-piece chrome to multi-piece wheels available with chrome centers and black powder coat outsers. If "one of a kind" is your goal, we guarantee an array of Renegade options!

CHROME

The traditional forged one-piece wheel in Renegade's classic chrome finish.

ELITE

Multi-Piece Elite available with chrome inner /black powder coat outer, or vice versa.

BLACK POWDER

This rich, dark black powder coating complements the latest trends in tone-on-tone or "blacked-out" bike styling.

HAND POLISHED

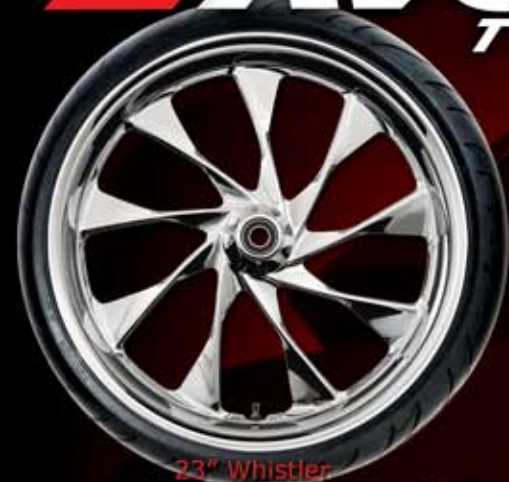

PHANTOM-CUT

Twice cut, twice the look... black anodized with cuts that are hand polished to give that smooth but edgy look.

Cog-Drive Rotors

Renegade's newest brake innovation is wrapped into the new "Cog-Drive"™ rotor system. The "Cog-Drive" incorporates the latest in braking technology with an improved captive spiral ring design (Patent Pending). It's sleekness of the brilliantly polished and chrome plated centers accent each and every matching Renegade Wheels design. The ground stainless steel outer ring is locked onto the 20 teeth of the Cog-Drive center using a unique stainless steel captive spiral ring. This new design gives all the benefits of traditional floating rotors without the unsightly hardware.
